

# LEGO CLASSROOM CHALLENGE

To celebrate the 65th anniversary of the patent date of Lego on January 28, we will have a display of lego creations in the OGE Mini-Museum. Ideas can be related to something you're studying - soil layers, lifecycles, plants or animals in Georgia (Popcorn!), buildings or structures used by Native Americans, colonists, or soldiers. It could also be a model of the school, your classroom, or an Atlanta landmark. The sky is the limit! (Well, not really - see size limits below)

CHRYSALIS:

BUTTERFLY:

WHAT: Lego classroom challenge

WHEN: **Complete by January 24, 2024**

WHERE: will be displayed in mini-museum

WHO: It can be a whole class project or a small group

HOW: if you don't have a classroom set of lego or duplo to use, have students bring bricks in (regular bricks are better than pieces from kits) or borrow some from science closet.

Note: since we hope to display all the creations in the mini-museum, please try to **keep design to a maximum of 14" in depth and 16" in width**. Height shouldn't be an issue.

*Designs will be picked up from your classroom **during dismissal on Wednesday, January 24**. Please make sure they are portable or can easily be reassembled. Please complete form below to be displayed with the design.*
